Ahead of COP 26, GCHA has analysed and ranked the inclusion of health in 40 Nationally Determined Contributions (NDCs) representing the plans of 66 countries (including the EU 27 which submits one joint NDC). NDCs are a country’s plan to reduce emissions and adapt to the impacts of climate change in line with the Paris Agreement.

On July 8th, GCHA will release a first round of analysis in the shape of:

The Healthy NDCs Scorecard which ranks countries depending on their incorporation of health into their climate commitments and takes into account overall climate ambition. Note: some countries’ NDCs are yet to be announced.

By joining our Twitter campaign, you can take action by challenging your governments to set ambitious
emissions reduction targets, embed health across all aspects of their national climate commitments, and protect the health of their citizens.

EMBARGOED UNTIL July 8th, 2021 0000 Brussels/ Paris/Berlin (GMT+1)

Sample social media posts

Ahead of #COP26 @GCHAlliance has analysed climate commitments from 66 countries based on climate ambition + integration of health in their NDCs. Overall, countries are far from where they need to be. Check out our #HealthyNDCs scorecards & find out more: https://bit.ly/HNDCs

*(Name of your country)* Is not doing enough to prioritise health in the face of a warming climate or to incorporate health into their climate commitments ahead of #COP26, according to #HealthyNDCs scorecard released today by @GCHAlliance https://bit.ly/HNDCs

Kudos! *(Name of your country)* has shown real leadership in incorporating health into its climate commitments ahead of #COP26, according to #HealthyNDCs scorecard released today by @GCHAlliance. The health community applauds! https://bit.ly/HNDCs

As a *(your profession, e.g. nurse, family doctor, pediatrician)* I want health to be central to our country’s climate policies. According to #HealthyNDCs scorecard released today by @GCHAlliance ahead of #COP26, our government *(had room for improvement/is doing a good job).* https://bit.ly/HNDCs

Protecting health in the face of climate change has little effect unless concerted efforts are also made to reduce greenhouse gas emissions. *(Tag the gov. or Health/Climate Minister of your country: United Arab Emirates / Vietnam / Mexico / Argentina / Chile)* must deliver on #ParisAgreement #HealthyNDCs. Find out more: https://bit.ly/HNDCs

Ahead of #COP26 @GCHAlliance analysed climate commitments from 66 countries based on emissions reduction targets + integration of health. #Australia #NewZealand #Brazil #Norway fail to consider health & show lack of climate ambition. Adopt #HealthyNDCs https://bit.ly/HNDCs

With countries making up ~ 50% of global emissions yet to publicly update national climate commitments ahead of #COP26, massive opportunity for govs to adopt ambitious #ClimateAction, reap health benefits of #HealthyNDCs & bolster economies. https://bit.ly/HNDCs
Ahead of #COP26, countries that have yet to submit their national climate commitments must ensure that time, resources & cash are invested into health systems, to protect against severe health impacts due to environmental damage. Adopt #HealthyNDCs https://bit.ly/HNDCs

Ahead of #COP26 @GCHAlliance analysed & ranked 66 countries based on inclusion of health in their climate commitments. High scores for #CostaRica #Senegal #Laos #Rwanda #PNG #Lebanon - where health impacts of climate change are clearly felt. +Info https://bit.ly/HNDCs
